

Project Design Phase-I
Proposed Solution Template

Date	19 September 2022
Team ID	PNT2022TMID34115
Project Name	Project - AI-powered Nutrition Analyzer for Fitness Enthusiasts
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	People all over the world are more concern of being fit to look good or to have that confidence to slay at anywhere ,so far to be fit they need to follow certain diets ,people who work for long and people with health issues may not be able to follow up those diets and need a fitness enthusiast who can help them balance the nutrition in the body and help them stay fit and lead a healthy life style
2.	Idea / Solution description	AI and its various subsets have been leveraged by these platforms to identify the calorie intake and also to make food recommendations for a healthy diet. In most cases, what we see is that these platforms act as a data repository where while providing real-time information to its users, it also makes available to numerous clients who work in this field for a determined rate
3.	Novelty / Uniqueness	Recognition of unwanted fat and suggest diet chart according to that is the novelty of our project
4.	Social Impact / Customer Satisfaction	Customers gets to know about what kind of food they need to intake to maintain the nutrition level of the body and helps them reduce weight wisely
5.	Business Model (Revenue Model)	This model should be designed in a way that both the fitness enthusiasts as well as the fitness freaks from different background at anytime can access and get benefitted

6.	Scalability of the Solution	can scale for all age groups and body types
