

## Create HTML Pages

- We use HTML to create the front-end part of the web page.
  - Here, we have created 3 HTML pages- home.html, image.html, imageprediction.html, and 0.html.
  - home.html displays the home page.
  - image.html is used for uploading the image
  - imageprediction.html will showcase the output
  - 0.html is to showcase the result. It tells the action to be performed on imageprediction.html while showcasing the result.
  - For more information regarding HTML <https://www.w3schools.com/html/>
  - We also use JavaScript-main.js and CSS-main.css to enhance our functionality and view of HTML pages.
- o Link: [CSS](#), [JS](#)

Home.html looks like this

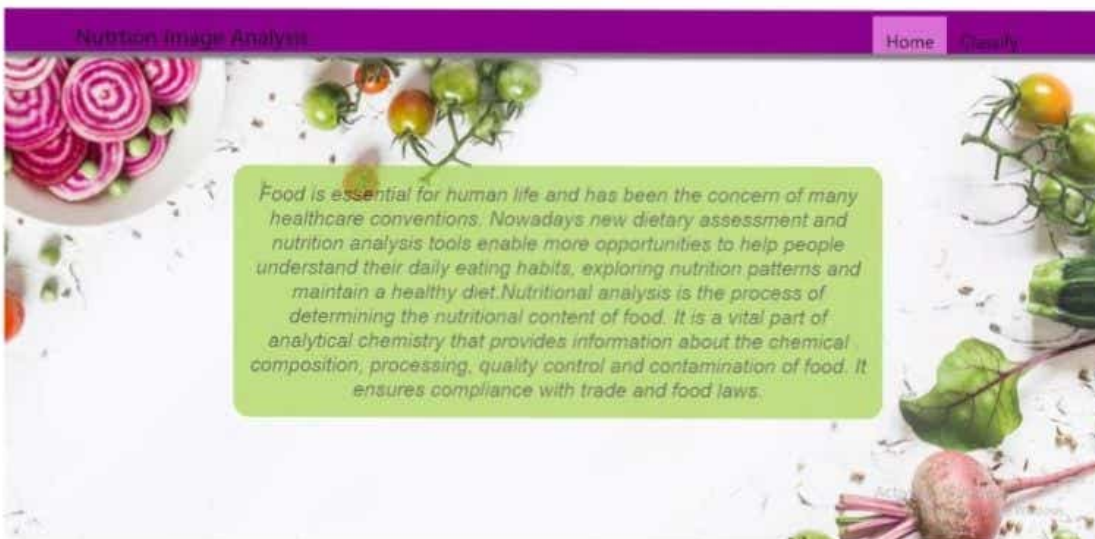

image.html

Imageprediction.html
